

# Save Our Pets

It is tragic enough when a family loses its possessions to a fire. It is doubly tragic when a family loses a member of its family – a pet. The Lancaster Fire Department quite often rescues pets from fires. It would increase the pet's likelihood of survival if the Fire Department could administer oxygen to the rescued pets. Unfortunately it is difficult to administer oxygen with an oxygen mask made for a human. A solution is available. Pet oxygen masks are available in kits of three sizes to meet the needs of various sized dogs and cats.

Fat Willie's Pizza and [CrabbyFatGuy.com](http://CrabbyFatGuy.com) want to help. For every purchase made on a Tuesday during the month of May Fat Willie's will donate 10% of the sale to the purchase of pet oxygen mask kits to be used by the Lancaster Fire Department.
